Pay as you save with complete peace of mind

from
£0
upfront

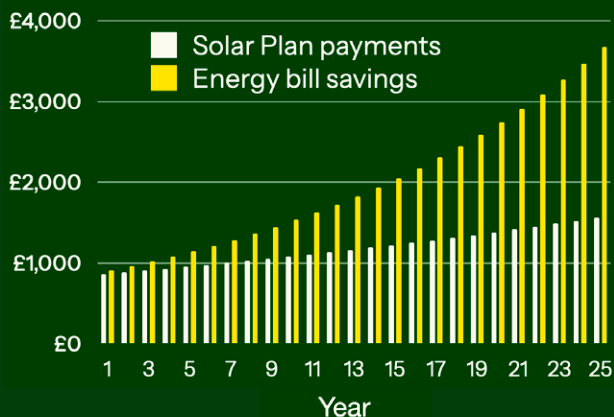

The Hometree Solar Plan makes it simple and affordable to switch to clean, green power and start saving on your energy bills.

It's an all-inclusive lease, with low or no upfront cost. You get a custom-designed system installed and gain the full benefits of the generated and stored energy, bill savings and export payments.

We take care of monitoring and maintaining the system, giving you confidence that it'll run efficiently and safely, with no unexpected repair or replacement costs for the lifetime of your plan.

Find out if you could make a net saving from year one

“Being able to spread payment while making savings made our decision simple.”

Julie S

Based on a 25-year Solar Plan with £0 upfront. You can reduce your monthly payments by choosing a larger upfront amount. System value of £10,000; typically 4.5kW 10-panel system with 5-10kWh battery. Median annual savings including ESS & export for Hometree customers with systems of this value. Annual inflationary increases: 6% assumed for savings; 2.5% included in payments. Inverter / battery replacement are included in the plan at no extra cost. **Figures are indicative.** Actual savings could vary significantly based on your location, system specification and configuration, utility rates and current / future energy usage. Your personalised design, quote and forecast savings will be provided by your installer and independently validated by EPVS.

What's included?

Gain energy independence and future proof your home with reliable service and predictable costs.

Solar Plan

from
£0
upfront

✓ System installation

Solar PV & battery system from leading manufacturers, installed to the highest industry standards by skilled engineers.

✓ Performance monitoring

Remote monitoring and periodic inspections ensure optimal efficiency and identify issues before they impact performance.

✓ Unlimited repairs

System maintenance and repairs (parts, labour & access) are covered for your plan term with no callout fees or hidden charges.

✓ Replacement protection

We'll replace any equipment that fails within your plan lifetime at no extra cost, even if the manufacturer warranty has expired.

"We feel safe in the knowledge that our system is covered from now and into the future."

Roy W

Example monthly payment options

Based on a £10,000 solar and battery system installation and a 25-year plan. You can choose from 5 to 25 years of hassle-free power generation, with the option to settle at any time if your circumstances change.

£0

upfront

£64 /month

£2,500
upfront

£56 /month

Price varies, apply for your personal quote. Offers are subject to status and finance agreement. First payment of upfront amount plus month 1 payment will be taken by direct debit once the system has been installed. Monthly payments are subject to an annual increase of 2.5%. Missing payments could have severe consequences and make obtaining credit more difficult.

How it works

We're here to help you get a payment plan to fit your needs, hassle-free installation, and comfort around ongoing system performance and costs.

01

Design

Your installer will survey your property and design a system to suit your home and energy needs. They'll provide detailed equipment specifications and energy-saving forecasts.

"Easy process from start to finish."

Mathew T

02

Apply

Alongside their quote, your installer will send a personal link to apply for the Solar Plan. Complete our application, choose your plan, then you're ready to sign our online agreement.

Secure online application

Instant decisions

Won't impact credit score

14-day cooling off

03

Install

Your new system is installed, and remote monitoring is set up. We get in touch to check that you're happy with the work before your payments begin.

Rated 4.9 out of 5
on cleanliness, courtesy
and promptness

04

Relax

It's time to enjoy your energy savings! We'll take care of system monitoring, maintenance and repairs – we've got you covered for the lifetime of your plan.

Our guarantees

Your Solar Plan is backed up by Hometree Finance's guarantees.

Fair price promise

We check installation quotes against national benchmarks, so you can be confident that your system has been priced fairly.

Risk free application

Our secure application only takes a few minutes and won't impact your credit score. There's no obligation to proceed once approved.

Financial sense check

Before offering finance we verify that the forecast return is worthwhile. If it's not clear cut we'll double check you're happy to proceed.

Independent validation

EPVS review your energy forecast calculations. They'll also call you to check you're comfortable with the figures and your finance choice.

Satisfaction guarantee

We'll get in touch after installation and every maintenance visit, to check that you're happy with the engineer's work.

Cancel anytime

You can end your plan at any time by paying the settlement amount in your agreement, with no quibbles or penalties.

"A great experience for such a major investment. I confidently recommend."

Michael R

You're in safe hands

The Solar Plan is delivered through our network of accredited partners. You get the benefit of consistent service from a renewable energy expert, with the reassurance of Hometree's guarantees and all-inclusive payment plan.

- ✓ Independently verified savings
- ✓ Qualified, experienced engineers
- ✓ Industry-leading consumer protection

In partnership with

Partners you can trust

All our partners are fully insured, certified by MCS or Flexi-Orb, and members of a trusted consumer code (HIES or RECC) to give you confidence that you'll be informed and protected on your home improvement journey.

They'll send your personal Solar Plan quote with a link to apply. Contact us if you have any questions about your application or agreement.

FAQs

Find out more and view all FAQs
at hometreefinance.co.uk

Who is the Solar Plan for?

Homeowners installing solar PV and battery systems in owner-occupied or privately rented properties in England and Wales.

How long is the plan term?

You can choose from 5 to 25 years before signing your agreement. In some cases our £0 upfront option may not be available.

How much can I pay upfront?

We offer three upfront payment options: £0 and two larger amounts, up to 25% of your system installation value. This will be taken by direct debit alongside your first monthly payment, a few days after installation.

How do I apply?

Your installer will send you a personal link to apply alongside their quote. Our secure online application only takes a few minutes, won't impact your credit score, and provides instant decisions in most cases. There's no obligation to proceed once you've been approved.

What equipment will I get?

Our plans are available across a range of leading manufacturers. Your installer will design an appropriate system, tailored to your property and energy usage.

How soon can my system be installed?

Lead times depend on your chosen installer's availability, so it's best to check with them.

Who will install & maintain the system?

Our nationwide network of accredited partners install quality systems and maintain them with care, giving you consistent service from a trusted provider. They'll be friendly, punctual and tidy when working at your property, and we'll check in with you afterwards to make sure you're happy with their work. On the rare occasion that they're unavailable, we'll arrange an alternative through our network.

What's the APR?

As the Solar Plan is a lease, not a loan, you're not paying down a borrowed sum plus interest. Your payments give you full use of the system including all generation, storage, bill savings and export payments. You also get our remote monitoring service, periodic on-site inspections, and repair and replacement of the installed equipment for the plan lifetime – even if the manufacturer warranty has expired.

Monthly payments are subject to an annual increase of 2.5% to reflect the increasing cost of maintaining the system over time. We always use manufacturer approved parts and pay fair market rates for skilled labour.

What if I move house?

You can end your plan at any time by paying the settlement amount outlined in your agreement. If you're selling your home, you can settle before marketing your property, or through your solicitor from the sale completion funds. Alternatively the buyer of your property can apply to take over the remaining plan term. To ensure that we're notified if you sell your home, we apply a restriction on title, which is automatically removed once your plan ends.

How much is the settlement amount?

In your agreement you'll find a table showing the settlement amount due in each year of your term. This will never be more than the system installation value minus any upfront payment, and it doesn't include any surcharge for ending your plan early. As an example, for a £10,000 system where you chose to pay £1,250 upfront, the settlement amount in year one will be £8,750, decreasing in subsequent years.

What happens at the end of the plan?

If you choose to upgrade your system we'll set you up with a new Solar Plan. Otherwise your plan will automatically end as per our terms. Our monitoring and maintenance service will end and no further payments will be due. We will only remove the equipment from your home if you ask us to.

“The Hometree team were incredibly prompt to react, polite, approachable and very knowledgeable.”
